

Dear Resident:

The LIRR Expansion Project, one of the region's most significant transportation infrastructure projects, is well underway throughout communities along a nearly ten-mile stretch of mainline track from Floral Park to Hicksville. The project will improve mass transit, reduce traffic congestion, protect the environment, and enhance quality-of-life for communities along the Main Line.

Utility work associated with the elimination of the at-grade crossing at New Hyde Park Road has begun. Work related to relocating sewer, water, and natural gas service is taking place at various locations in the area of the LIRR right-of-way at New Hyde Park Road, both north and south of the tracks.

This utility work will make it possible for future excavation that will allow New Hyde Park Road to run under the LIRR tracks, improving safety and eliminating the bottle-neck that exists at that location. Work on construction of the underpass is scheduled to begin in October 2019 and continue through July 2020.

Utility work will result in single or multiple lane closures or full road closures. Detailed Maintenance and Protection of Traffic Plans (MPTs) have been developed that include flaggers, signage, and traffic control devices, to warn and direct drivers and pedestrians.

During the next month, scheduled utility work in this area of Garden City, Garden City Park, and New Hyde Park includes:

- Sanitary Sewer Installation @ New Hyde Park Rd North of LIRR Tracks
Multiple lanes closed
- Water Main Installation @ Clinch Ave and Greenridge Ave
Full road closure at north end of Clinch
- Gas Main Installation @ 2nd Avenue North of LIRR Tracks
Single lane closed
- Water main Installation @ New Hyde Park Rd South of LIRR Tracks
Multiple lanes closed
- Water main Installation @ New Hyde Park Rd North of LIRR Tracks
Multiple lanes closed

Respectfully,

Your New Hyde Park and Garden City/Garden City Park Community Ambassadors
