

Dear Neighbor:

3<sup>rd</sup> Track Constructors (3TC) is making significant progress on the LIRR Expansion Project from Floral Park to Hicksville. Here in New Hyde Park, work along the right-of-way will continue.

Back in May the LIRR Expansion Project marked an important milestone when the new Nassau 1 Interlocking was officially put into service after rigorous testing. The new system is part of a comprehensive modernization effort to streamline operations, optimize flexibility, and ensure the safe movement of trains along the corridor. Read more about the new switch [here](#).

Since the new Nassau 1 Interlocking has been installed, it's now time to remove the Old Nassau 1 Switch. This weekend, on Saturday, September 11 and Sunday, September 12 LIRR hi-rail trucks will be staged between New Hyde Park Station and Merillon Avenue Station to support the removal of the Old Nassau 1 Switch. Additionally, to support this operation, surfacing work will occur on Sunday morning and last throughout the afternoon.

When trains are not in use, they will be staged along the right-of-way, west of Covert Avenue.

Crews will also be working on the third rail at New Hyde Park Station on Saturday. Residents will notice LIRR trucks in the vicinity of the station to support this operation.

To avoid LIRR service interruptions during peak commuting hours, LIRR work along the railroad right-of-way may take place overnight and on weekends.

We have made great strides on New Hyde Park project elements, and on project elements across the Main Line Corridor, and we greatly appreciate your patience.
